Title *

Late Blight (Potato/Tomato):

Content *

Late blight is a fungal disease caused by *Phytophthora infestans*.
It creates dark, water-soaked spots on leaves and fruits, spreading quickly in cool, wet weather.
If not controlled, it can destroy the entire crop in a short time.

7. Unfinished tasks, Issues & Blockers

- No unfinished tasks
- There were many issues which I research and fix step by step by learning.

8. Sprint Status & Next Steps

8.1 End of Sprint Trello Screenshot

8.2 Next Sprint Focus:

Focus on finalizing the system by integrating the payment gateway, completing customer support features, polishing UI across all pages, and finishing all validation work for a smooth, production-ready release.
